This memorandum reports the completion of a request from

[REDACTED] OOI, for a photographic study of the airplanes on
• NAN-HAI Airfield, SE China to determine the existence of reported
• Mig-17 aircraft at this field.

The latest available aerial photography was procured and a
very intensive examination was made, including photogrammetric
measurements and sketches. Although the photography was only of
fair quality, it was our conclusion that these planes were not
Mig-17's. This information was given orally to the requester.
When later photography of this field is available, a further
study will be made.

"T-54" TANK STUDY

This memorandum is in reply to a request from I/AR to determine solely from ground photographs, the dimensions of a tank reported to be a Soviet T-54. These photographs supplied by requester, were inclosures to CIA Information Report No. [REDACTED] 25X1A

A sketch was prepared after a careful study of the photographs. By specific request of I/AR, no attempt was made to utilize other intelligence sources. Due to lack of photogrammetric data, dimensions were based on the assumed height (67") of a man observed standing on the tank. Dimensions shown on the sketch are approximate.

Photo Reference: CIA 163838-163844, dated 2 February 1955.

Other Reference: CIA Information Report No. [REDACTED] dated 11 March 1955.

LU-CHIAO AIRFIELD

This memorandum is submitted in reply to a request by OCI/FE for information concerning reported construction of a large airfield in the vicinity of Lu-Chiao, China.

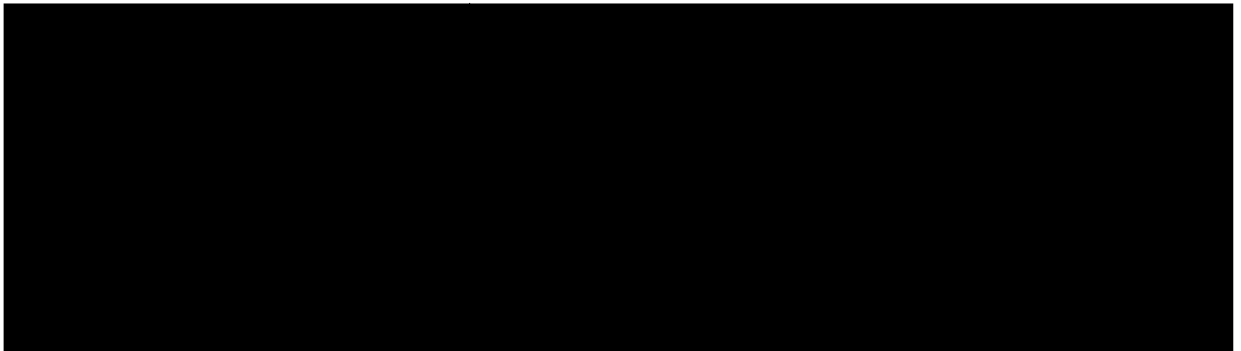

25X1C

The latest available photography of this region was taken by

 This photography, noted below, covers the area within a 7-8 mile radius of Lu-Chiao and in addition gives coverage of an 6 mile wide strip from Lu-Chiao East to the coast.

This area was studied carefully, but no evidence of airfield construction was observed. Clouds covered small portions of the terrain and it is possible that early stages of airfield construction could have been hidden from view. Late reports indicate that there is more recent photo cover of this region. When this photography arrives in Washington it will be carefully studied in an attempt to locate the airfield reported under construction.
